BP2600

Bench press for 1/2-swaging all bar sizes up to 57mm. Double acting cylinder connected to 10 or 15 hp pump for high fabrication shop productivity - includes foot control, lifting eyes and leveling feet - weighs 725 kg.

BPI® COUPLER SIZES

Ø10 - Ø57mm

BPI® swaging equipment for the installation of coupling sleeves and connectors consists of a hydraulic **PRESS**, **PUMP** and **HOSE** with suitable swaging **DIES**.

Press models for field swaging range in size from the BG 250 for splicing #3 - 6 rebars (Ø10 - 20 mm), to the BG 1140M for splicing bars up to #18 (Ø57 mm). Each press is provided with a lifting handle and/or lifting eye for support. By a simple change of die set, each press is capable of swaging multiple sizes of coupling sleeve inclusive of BarGrip - XL - UXL - Transitions and Structural Connectors. For ease of use, dies and coupling sleeves are stamped and color-coded to match.

A hydraulic pump, electrically-driven or gasoline-driven, connects to the press by means of a hose with quick-disconnect ends. The equipment operator depresses a foot control to actuate the system. As the ram of the press extends and pushes the dies towards each other, a portion of the coupling sleeve is forced to deform around the rebar and interlock with the bar profile. When each swaging bite has been completed, a pressure switch built into the pump, automatically stops the process to allow the ram of the press to retract for the next bite. *After a coupling sleeve has been fully swaged, the operator simply slides the outer die out of the press for convenient removal of the press from around the spliced rebar.*

A Bench Press can be utilized by the rebar fabricator to efficiently 1/2-swage coupling sleeves to rebars ahead of shipping, thereby saving time on the jobsite.

NOTE: In lieu of shop 1/2-swaging with a Bench Press, it may sometimes be appropriate to use a field press such as a BG1140M or BG750M - contact BPI for assistance with your application.

BPI® Equipment is available for lease or purchase. Equipment must be used in accordance with manuals, lease agreements, manufacturers' directions and all safety instructions.
